'PACKAGING'

The Monthly Technical Journal

★ is the oldest and leading British journal in its field. It has the *largest paid circulation* (Audit Bureau of Circulations) *plus* a carefully controlled distribution throughout the industry. It covers all significant packaging developments both in the UK and on the Continent.

★ articles written in an informed and balanced style present the news of materials, methods and machinery developments available throughout Europe and serving the needs of the new Europe.

★ further information and advice on all packaging matters, based on continuous contact with all sides of the industry, is available on request.

★ the packaging industry—the most complex of all industries since it serves all other industries and manufactures—is reviewed month-by-month, each aspect being treated in respect to all the others. Thus the æsthetic and sales-aspects are balanced against the functional values of a given package and the economic aspects are given their due importance.

★ the machinery available to the *package-manufacturer* and to the *package-user* is fully described, this being an aspect of the industry in which PACKAGING can claim exceptional authority.

★ a digest of world-news, translated from the packaging journals of the world, enables the reader to keep in touch with world-opinion and trends.

THE PACK THAT MADE A CUSTOMER

Research has shown that 7 out of 10 purchases in supermarkets are decided upon after the customer comes into the store.

Eye-appeal is undoubtedly a very important factor contributing to impulse buying.

NOW-

Cut stitching time in half

with the new Vickers Dual Head Stitcher

Floor space is reduced and stitching time halved with this new stitcher. The two adjustable feed Empire stitching heads work simultaneously and only one head position need be altered. Box widths between 4½ in. and 12 in. (11.4 cm. and 30.5 cm.) and all thicknesses up to 5/16 in. (7.9 mm.) can be stitched. Box manufacturers find there is a sturdy Vickers machine for every process. They are all fast, simple to operate and exceptionally reliable, giving years of efficient service at negligible upkeep costs.

When making enquiries, please give us complete details of your special requirements so that we can advise you on the most suitable machine.

Fruitful Packaging

Sow the seeds for a bumper crop of sales by choosing Dickinson packaging. It's colourful, cleverly designed—with a touch of the ingenious when needed. Many have written to us for advice on packaging and reaped a bountiful harvest. We would like to help you, too.

Packaging Bags from Paper, Film, Foil, Polythene and Laminated Materials, etc.; Seal-Easi Bags; Karrier Bags; Powder Pockets and Envelopes; Transparent Containers and Window Cartons; Gummed Paper Tapes; Self Adhesive Tapes; Stay Papers; Embossed Gummed, Heat Seal and Self Adhesive Seals and Labels.

THE WHOLE BOX OF TRICKS

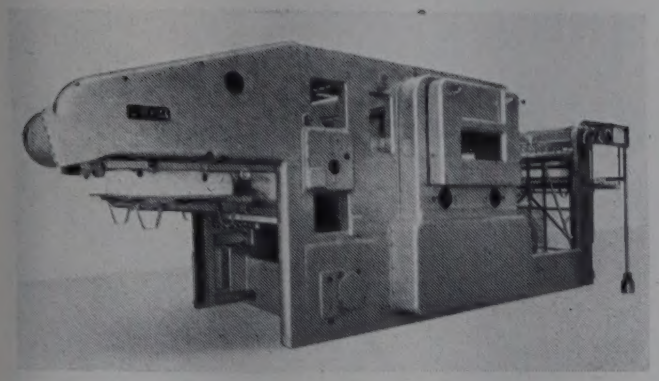

Some people imagine that Robinsons are only concerned with the actual making of boxes. Not so! Modern packaging demands something more than just 'a box'. Its colour and design must be eye-catching so that it stands out in a competitive field. These are vitally important preliminaries with which Robinsons are also concerned. Our designers and technical experts are always ready to co-operate with manufacturers in these matters. The long list of well-known packs of every description with which Robinsons are associated is sufficient evidence of our 'know-how'. Yes, when it comes to packaging Robinsons can do the whole box of tricks!

NETLON PLASTIC PACKAGING NET Spicers are sole distributors in the United Kingdom for NETLON pre-packaging material, the outstanding new product formed as plastic net by extrusion. NETLON material is supplied in the form of bags and continuous sleeving which, when sealed at convenient lengths, can be used on packaging lines to contain a broad variety of articles of regular or irregular shape. A wide range of colours, meshes and filament dimensions is available.

SELF ADHESIVE CARBION Possessing the same protective properties as the standard material, Self Adhesive Carbion promises considerable savings in time and money. It is coated on one side with latex solution, which adheres only to itself thus saving hours of packing time by its ability to wrap and secure a highly protective "live cushion" round goods of almost any shape in one operation.

CARBION "ELASTICISED" PAPER Spicers Carbion forms an attractive, easily applied protective packaging material in flexible sleeve or in flat and rigid forms, with outstanding properties of cushioning, crush-resistance and recovery. It is available in a wide range of dimensions and sleeve lengths, surfaces and finishes (including rigid Carbion for case liners and dividers).

prove superior in a wide variety of applications

All tubes and containers are designed and made especially for the specific end use. Available in a wide range of material make-ups and finishes tubes for industry may be colour coded for product identification and where used as a centre core can be supplied with tear back tape revealing a strip of pressure sensitive adhesive* for even faster joining of material, prior to winding. A new range of plastic closures and decorative outer plies create the container that wins consumer acceptance. ** PATENT No. 860414.*

latest products include the—

ROL-CON *This new drum with sure fitting tight sealing metal closure is available with barrier liners. Ideal for small quantity packaging of products in both powdered and crystal form.*

ROL-PAK* *A time and money saver. This new postal tube requires no end closure or wrapping. Quick release tag enables recipient to remove contents speedily and without damage.* ** PATENT PENDING.*

ROL-SAC* *A really efficient pack designed for mailing small samples. Custom built it is available with barrier liners.* ** PATENT PENDING.*

Put 2 and 2 together for better presentation

and bigger sales

Here's a *new* "Bubblepak" to look into—the B2C Pack! It makes possible still *greater* economies—uses a minimum of the crystal-clear plastic film and adheres to a single thickness of card. The heat-sealing process is as swift as it is sure, a solid bond being achieved in 1-2 seconds with the specially developed transparent adhesive.
Sparkling display presentation . . . hygienic protection from fingering and dust . . . safe handling . . . brand name prominence . . . advertisement at point of sale—it gives your product all the proved selling features of other "Bubblepak" designs.

The NEW HEAT-SEAL "Bubblepak"

PATENT No. 810664 Regd. Trade Mark

Heat-sealing equipment available, at very moderate cost, or on contract hire.
No heavy capital equipment expenditure.

✱ MAXIMUM ECONOMY

Speedy, low-cost assembly

✱ MAXIMUM IMPACT

Choice of card, colours and printing

✱ MAXIMUM SALES

In common with all "Bubblepak" models

'Queensway' Polythene bags for the Packaging Industry

From Europe's largest maker of Polythene film

Now you can get polythene bags under the trade name 'Queensway', tailored for you by British Visqueen Ltd., the largest producer of polythene film in Europe.

What does this mean to you in the packaging industry?

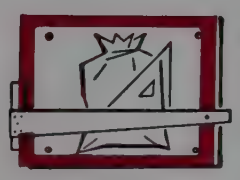

Simply that the accumulated "know-how", the up-to-date equipment and the complete printing and design service of British Visqueen are now geared to provide you with a comprehensive packaging service.

EXPERT PACKAGING SERVICE British Visqueen have been the acknowledged experts on polythene film packaging for many years: they are the people who solve problems for packaging experts. They ensure the selection of the correct grade of polythene film, to be tailor-made into the ideal 'Queensway' bags for your product.

PROMPT DELIVERY Because of British Visqueen's modern equipment and large production capacity, you can be sure of getting the right bags right on time when you order 'Queensway' bags.

PRINTING AND DESIGN The British Visqueen design and print services make sure that your 'Queensway' bags have the extra "shelf appeal" of an attractively designed pack displaying your trade mark or brand name to the best advantage. This gives your product a head start at the point-of-sale.

RELIABLE PROTECTION 'Queensway' bags give your goods the reliable protection of British Visqueen's polythene film. They are hygienic and moisture-proof. They are clearly transparent, easy to open and they stand up to any amount of handling.

For a complete Packaging Service
Contact British Visqueen Ltd. today. They will arrange for a representative to call on you at any time that suits you.

Do you know that . . .

'Packaging' deals with ALL aspects of packaging and packing, from the packing of heavy goods for safe shipment to all quarters of the globe to the problems involved in packaging minute items or spares?

'Packaging' with its unique coverage of world-wide developments in materials, methods and machinery keeps you in touch with every significant trend?

'Packaging' deals not only with the package-users' needs, but also describes the latest developments in the machinery used for the production of packages?

'Packaging' devotes space to converters' equipment not only because of its interest to converters all over the world, but because what concerns the package-manufacturer this year will benefit the package-user next year. Further, many product-manufacturers are also converters, producing packages for their own requirements and the same materials concern them equally in both respects.

Therefore . . .

Your Advertising Schedule will be incomplete unless you include 'Packaging' and 'Packaging Directory'. Write to the Advertising Manager for Rate-card and other information.

The Western Influence

More than just television and cowboys — it is good salesmanship bringing the right of choice, better pay, improved conditions, good health for children — time to play with them.

Western salesmanship influences quality, hygienic handling and good delivery — you can see it in advanced packaging, in goods well wrapped to arrive safely and in 'just made' condition.

Look at aluminium foil — sparkling and attractive. Foil — protective, guarding the guarantee of brand names. Foil — barrier to moisture, in or out — reflecting light, reflecting heat, reflecting a way of life no less.

***The West sell in foil — the best buy in foil* — STAR FOIL**

YOUR GUIDE TO SUCCESSFUL PACKAGING

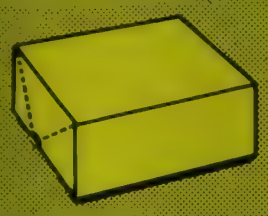

FORMFAST

The popular, labour-saving makes-up-as-you-open-it carton. Boxfoldia introduced automatically-glued self-erecting cartons into this country in 1952.

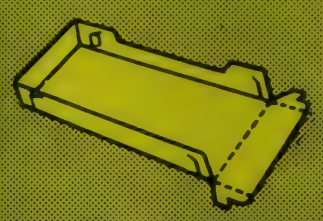

CRASHLOCK

Self-locking base: slight pressure on the side creases of the carton, tray or display container, locks the base flaps firmly in position.

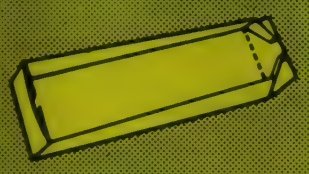

STANDFAST *

An important new Boxfoldia development: self-erection *without losing strength*. The diagonal creases are supported and side walls held erect, giving an exceptionally strong box.

QUICKLOCK

Supplied flat (no glueing). Expert die-making and cutting and creasing ensures precision blanks for trouble-free erection on Forgrove TL and other machines.

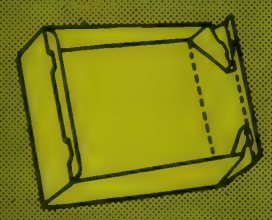

RAPIDPACK *

Self-erecting tray, no diagonal creases to weaken the panels or detract from appearance. Gussets strengthen the end panels. Quick and economical glueing. Designed for over-wrapping.

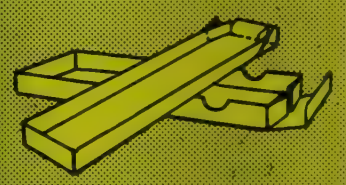

REINFORCED

One-piece construction — no glueing or stitching — designed for strength. Reinforcements on sides, front, back and corners. A 7 lb. outer will withstand 400 lbs. pressure.

LOCKFAST *

Also for over-wrapping, without diagonal creases, economical in material, and straight-glued at top speed. Locking clips hold the tray or carton erect.

DOUBLE WALL CARTON *

Excellent appearance and rigidity. The advantages of the set-up box with the economies of the folding box. Printing inside without extra cost, and base can be cut to form a holding platform.

* Patents or Patent applications.

BOARD PROCESSING BY BOXFOLDIA

Lamination for strength. Where strength or a particular finish (e.g. coated surface or kraft backing) is needed, we laminate the board for the particular requirements of the order.

Lamination for protection. We wax-laminate greaseproof or glassine linings for grease or moisture resistance — and foil papers for the luxury look.

Illustrated above are some of the carton styles and materials that we have developed to meet the needs of modern marketing. But each packaging project must be dealt with individually to arrive at exactly the right pack for each product. This is where the advice of our Technical Representatives, the creative ideas of our Carton Design Department and Studio and the experience and skill of our Production Departments will be of service to you.

Have you considered—

★ **How much time you can save yourself by reading 'Packaging' each month? 'Packaging' keeps you in touch with all significant developments throughout the world, and describes in accurate detail the machines, methods and materials which can concern your packaging needs.**

★ **How much time you can save yourself when considering some new packaging need if you write or telephone 'Packaging'? It is so easy to overlook some promising alternative scheme, or to adopt a method which will entail complete re-equipment, when it might well be possible to incorporate existing machines in the new production-line.**

★ **How much time you can save yourself by utilizing the 'Packaging Directory'—which forms part of the 'Packaging' service to industry—to obtain a variety of quotations for any specific need?**

★ **How much time you can save yourself by enquiring from 'Packaging' what methods are used abroad to solve your particular problem, and what machinery or materials they use? This can save a lot of experimentation; you can learn from other people's successes and failures.**

ARE YOU INTERESTED IN OVERSEAS MARKETS?

According to MODERN PACKAGING of New York, the only other packaging journal which approaches their own readership-value copy for copy is PACKAGING of London . . . quoting the John T. Fosdick Associates Inc. 'Study of Magazine Readership and Purchasing Influence in the Packaging Field'.

. . .

North American firms read and study PACKAGING because it gives them a perspective on British and European developments . . . because so many of the American developments originate in Europe . . . because in Europe most of the important developments in techniques and materials are invented . . . even though their expansion and exploitation in the United States may be on a greater scale.

. . .

Commonwealth countries read and study PACKAGING because British and Continental methods and machinery are closely attuned to their own needs and scale of production.

. . .

European countries read and study PACKAGING because English is the one common business language, and because PACKAGING deals with all-European developments.

. . .

Converters throughout the world read PACKAGING because only PACKAGING deals as faithfully with the news of every important development in package-converting equipment as with the package-users' machinery and equipment.

With its rapidly increasing circulation, "Packaging" provides its advertisers with an ever-improving coverage

and if that's where your markets lie you can do no better than pack your goods in the attractive, protective cartons that Mardon's make. And if you concentrate on home markets the same applies. For Mardon's boast originality in design, technical excellency in printing and slide-rule accuracy in manufacture. For every commodity for sale at home or abroad, the best cartons are made by

'Packaging' as an Advertising Medium

- PACKAGING, with the *highest paid circulation* of any British packaging journal (Audit Bureau of Circulations), and with a unique coverage of Europe as well as the Commonwealth, offers the best medium for advertising Materials, Methods, Machinery and Services.

- PACKAGING, with its Audit Bureau of Circulations certification, offers world-coverage not only in the English-speaking countries but also in all those countries in which English is the accepted business-language or the technical medium.

- PACKAGING, with its broad scope of editorial coverage of *package-manufacturing* and *package-using machinery*, provides *packaging materials' manufacturers* the broadest scope for supplying the constant needs of such machinery.

- PACKAGING, with its serious approach to serious problems, commends itself to the responsible manufacturer of machinery and materials.

- PACKAGING already carries the advertisements of all the most important manufacturers in Great Britain—for materials, machinery and equipment, as well as for bulk-packs and unit-packages used by every trade.

- Our readership includes *every trade and industry*, covering every kind of manufactured commodity.

- Readership is all-important to the advertiser, and the standard of the advertising which it carries is the best proof of its advertising-value.

Do You Realize?

★ That ONE idea or indeed ONE price-quotation obtained from 'Packaging' can save you far more than the cost of your annual subscription.

★ That ONE description of a successful development here or abroad can set you thinking about a parallel development in your own methods, and can save much unprofitable investment of time and money.

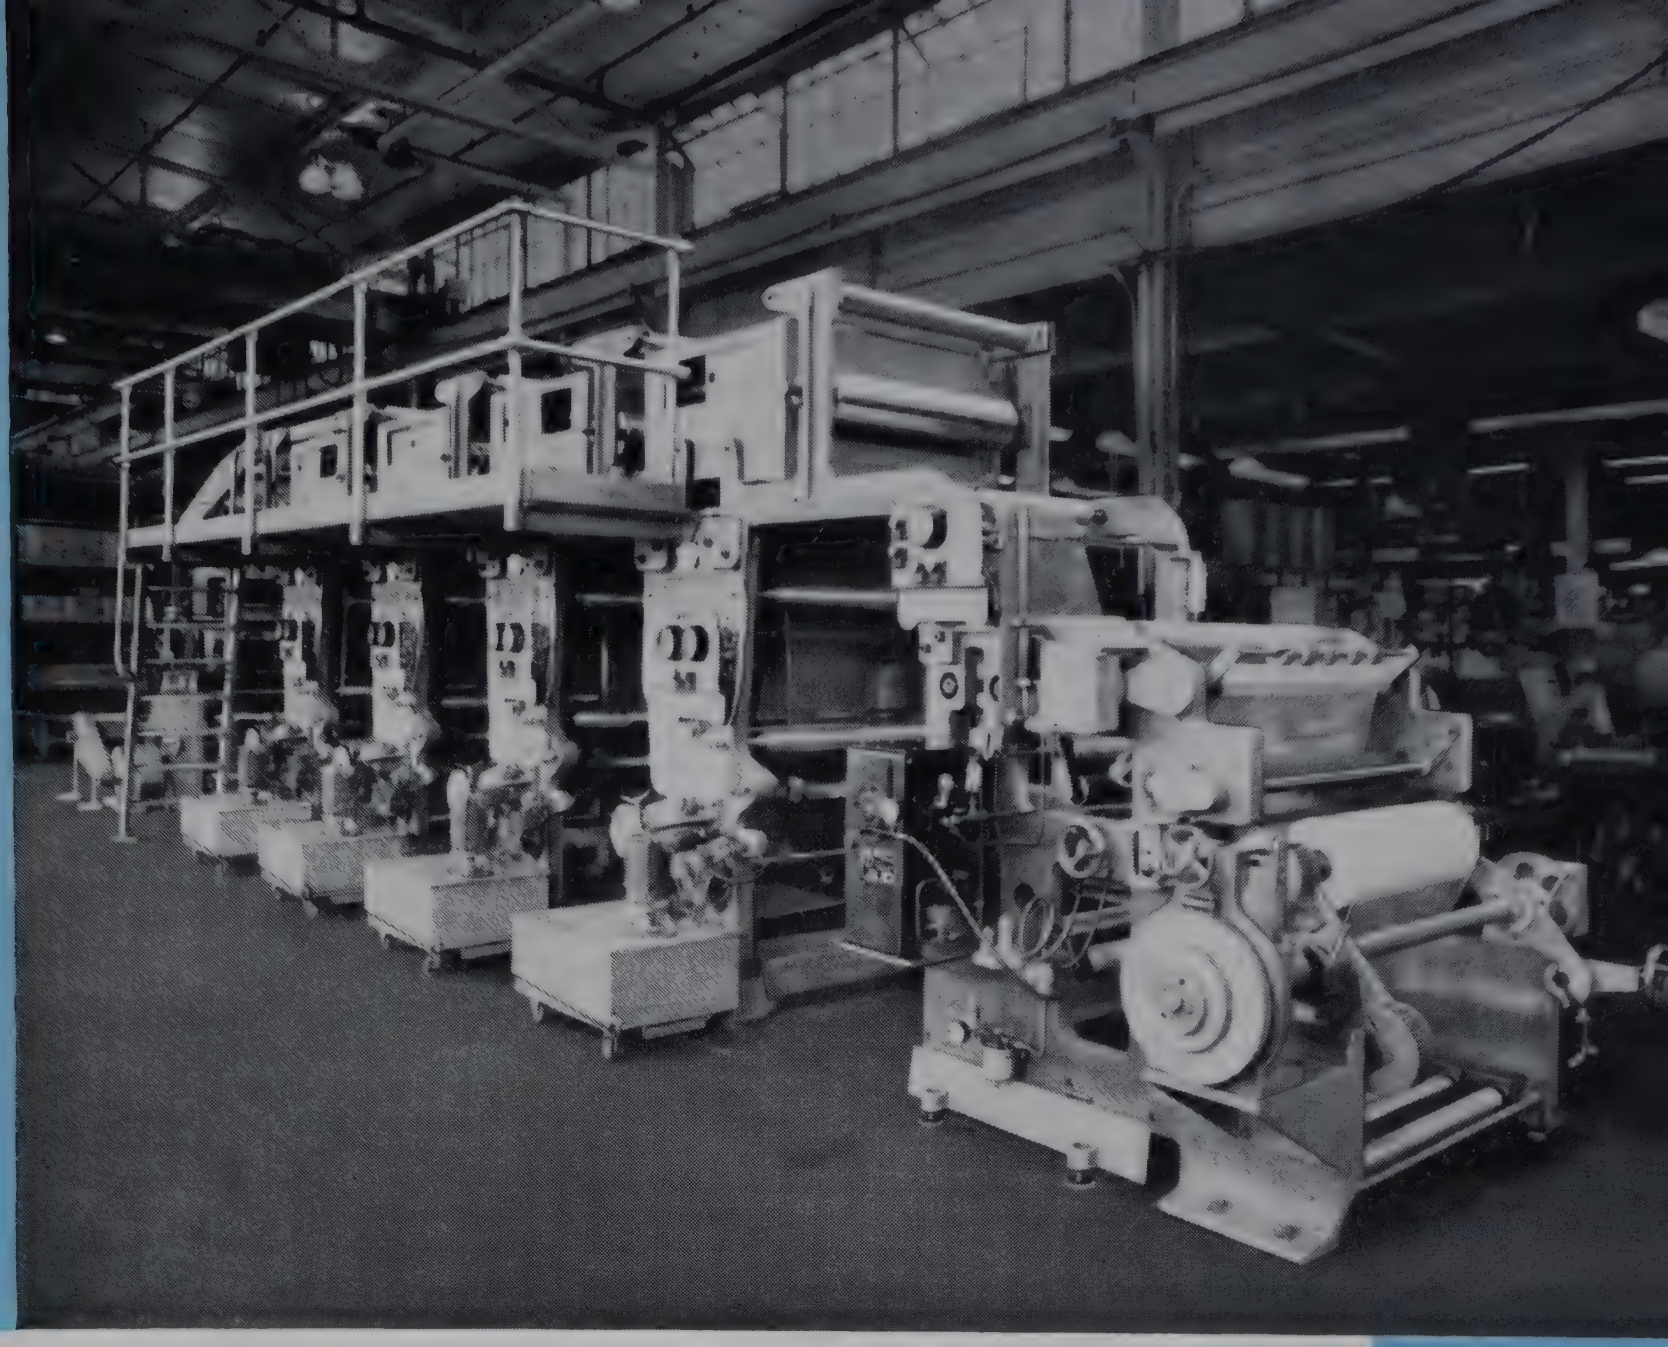

★ That ONE item explaining the reasoning behind some new development can enable you to direct your efforts more purposefully, and thus save you time and trouble.

★ That ONE reference to the 'Packaging Directory' will give you a full list of all possible suppliers, enabling you to make proper comparisons between all the quotations offered.

★ That ONE question directed to 'Packaging's' 'World-wide Enquiries' service will provide you with suggestions based upon wide experience, and will also elicit replies from all over the world.

★ That ONE subscription to 'Packaging' brings you also the 'Packaging Directory', which complements the service provided by the monthly journal.

EYE-CLASS APPEAL

MEANS A VENUS PACK

It is no longer satisfactory to have a pack which is merely serviceable, it has to be immediately recognisable, it has to reflect the high standard of the product within. Sales-conscious retailers know that a good pack means good business and they recognise what constitutes good packaging. In the competition for space the intelligently-conceived package is the one that takes pride of place in display—and in the eyes of the people who matter.

When pack-planning you should call in Venus Packaging for here are people who know all about 'eye-class' appeal: who know all about very, very good packaging. The many well-known firms whom they are proud to serve are the proof.

Venus design, manufacture and print only the best flexible and rigid packaging. An ultra-modern Polythene plant extrudes, converts and prints the finest film in the Country and the new Venus Design Unit specialises in the creation of the best in forward-looking graphic design.

Gordian 'G9' "STRAPNUMATIC"

THE GORDIAN G.9. STRAPNUMATIC cuts out laborious hard-work, using compressed air instead of muscle power. Every operation is speeded up and simplified including laying of steel band around case and applying seal—inserting band in strapping machine and tightening it—fastening and cutting off—removing machine from finished strapping. It is especially suitable for palletized goods. Uses $\frac{3}{8}''$, $\frac{1}{2}''$, $\frac{5}{8}''$, or $\frac{3}{4}''$ strapping.

Gordian MODEL Q
ELECTRIC STRAPPING MACHINE

Using Nos. 15-18 gauge Round Steel Strapping. Widely preferred for the speedy, easy way it handles cartons, cases and packages of any size and shape. Electrically driven. Completes up to 16 ties per minute. For conveyor system or as an individual unit.

Gordian
MULTIPLE HEAD BOTTOM STAPLER

For fast & Economical Stapling of container bottoms.

Four staples at one operation of foot pedal

POSITIVE CLINCHING FOR SECURITY

Gordian
CONTAINER STAPLING
MODEL R.A.

Closes filled containers from the outside using "super-clinch" staples.

Retractable anvils prevent damage to contents.

and gives increased profit
by CEFMOR-BREHMER

To produce economically, boxes which please both the client and his customer calls for the operator having the finest machines available.
Cefmor-Brehmer box-making machines give really fast, accurate and flush stitching—up to 300 stitches per minute!
Add to this that Cefmor-Brehmer machinery is renowned for its fine craftsmanship, long life and little need of maintenance and its value is doubly proven. When these truths have penetrated—and deep penetration with Cefmor-Brehmer box-stitchers is guaranteed—the obvious step is to write or phone to:—

There's danger in
Floccinaucinihilipilification!★

If you are underestimating the possibilities of paper tubes for packaging your product there's a danger you are spending far more than you need.

★Estimating as worthless

Our weekly production is in the region of five million units. We make a vast range of parallel tubes with inside diameters ranging from ·090 to 36 in. Wall thickness can be from ·010 to 1 in., and length from ⅛ in. to any practical figure required. These tubes can be made soft or strong, for once-only or repeated use, and with or without impregnation. They can go inside or outside your product. If you think, even remotely, that paper tubes might pack for you, we will be pleased to co-operate. Money savings are often phenomenal.

PATS. PENDING **the PNEUMATIC expanding reel spindle**

over 700 shafts installed in two years

Here at long last is the solution to a difficult problem. Up till now there has been no really satisfactory reel spindle. The old methods of fixing the spindle in the core by means of cones and screw devices or mechanical expansion, do not guarantee that the reel is firmly secured. Besides which, they use needless time and energy and are often the cause of waste.

PACKAGING DIRECTORY 1962

YOU ARE ENJOINED IN YOUR OWN INTERESTS

Firms in the packaging industry are earnestly asked to CHECK ALL ENTRIES relating to their own activities and to notify the Editor of any alterations or amendments, changes of classification, or changes of address or telephone-numbers. Firms holding agencies for foreign machines or materials are asked to notify us of any additions to the agencies they represent, or any addition to the range of machines which they can offer.

Where the introduction of new types of machines or generically new materials does not permit of inclusion under existing headings, we are glad to create new classifications which accurately designate the materials or machinery offered.

In a large and complex industry such as ours, the inclusion of an up-to-date listing of tradenames is also important to the user, who often has no other clue to the supplier than the tradename or symbol, and we therefore ask all suppliers to furnish us with details of any new tradenames registered or about to be registered in their company's interests.

PACKAGING, as the oldest-established and best-reputed publication in the industry, is anxious to make this Directory *as complete a guide as is possible*—and we ask for your co-operation to make this objective practicable.
